

T 60 TSP

Powerful three phase industrial vacuum cleaner for applications requiring high degree of suction like picking up fine dust particles i.e. cement which tends to clog filter in very short time. These vacuums are highly ergonomic and extremely safe in most demanding applications.

- Very powerful suction
- Standard cartridge filter ensures high degree of filtration
- Pneumatic filter shaker
- Stainless steel tank, optional antistatic filters
- Easy maintenance

T 75 S

A very powerful three phase vacuum cleaner with the turbine installed in a rear compartment. The considerable size does not facilitate movements, due to which these types of vacuum cleaners are best suited for environments where they can be used in a fixed position. Suitable for wet & dry applications

- Sturdy frame that makes it remarkably solid
- Ideal for heavy duty residues
- Tank material – painted steel
- Manual filter shaker
- Standard filter – Polyester radial
- Filters on request–Class M, H, Antistatic, Heatproof

TRI 100 ATEX

This is ATEX certified vacuum cleaner for use in areas where the maximum operating safety is required. It has been designed to work on dust with a potentially low explosion risk (potentially explosive areas classified as Zone 22).

They can therefore be used for cleaning ovens, in the chemical/pharmaceutical sector, mills, etc.

### PRO SHAKER

### M 402

### M 1003

### M 100 T

### TRI 30SS

### T 100 T

A unique intermediate powerful and versatile single phase DRY vacuum cleaner with a 50 ltr. tank capacity for specific light to medium duty dust/debris pick up.

- Ergonomic design
- Filter of 1.3 Sq mtr area
- Light frame ensures easy mobility
- Tangential inlet nozzle-improved suction
- Releasable trolley tank
- Manual filter shaker

Powerful & dual motor, versatile, heavy duty single phase vacuum cleaner for medium to heavy duty use. Excellent suction, heavy duty construction frame, high airflow and ideal tank capacity makes it suitable for tough industrial applications.

- Large filter surface area : 1.95 sq.mtr
- Optional Filters (M, H & antistatic) available
- Front squeegee adaptable
- HEPA filter available as an option
- Powder coated SS body
- Heavy duty Trolley
- Cyclonic filter separator
- Accessories Basket

High performance heavy duty single phase vacuum cleaner with three motors for multi-utility where the application demands greater suction & airflow. Ergonomic, robust & top performing design which ensures value for money & time.

- Large filter surface area : 1.95 sq mtr
- Electronic floats for absolute safety(optional)
- Optional Filters (M, H & antistatic) available
- HEPA filter available as an option
- Suitable for removal of microdusts

A Powerful Industrial vacuum cleaner with a strong frame , for heavy operations. With a single phase turbine its usable for wet & dry applications. Ready to accept a frontal squeegee

- Tank material – Painted steel
- Basket for accessories available
- Continuous operation
- Manual filter shaker
- Filters on request – Class M,H, Antistatic, Heatproof

Powerful three phase industrial vacuum cleaner for applications requiring frequent movements in reduced spaces. Reliable and designed for continuous heavy duty use, they are recommended for tough tasks in several industrial sectors such as ceramics, chemical, mechanical and textile. Ideal for vacuuming dust, particulate, and wharf chippings of whatever nature and liquids of any density.

- Fitted with a powerful three phase co-axial turbine excellent suction
- Is equipped with a radial filter for high grade filtration
- M&H class filters can be fitted as an option
- Powerful suction excellent vacuuming of the dust

An industrial vacuum cleaner with a strong frame , for heavy operations. With a three phase turbine it's usable for wet & dry applications. Ready to accept a frontal squeegee.

- Continuous operation
- Manual filter shaker
- Standard filter – Polyester radial
- Filters on request – Class M,H, Antistatic, Heatproof
